

IN THE SPECIFICATION:

Please replace the paragraph beginning on Page 27, line 19 and ending on Page 27, line 26, with the following:

Q1 Fig. 6 illustrates how a network server Master Mirror Server X uses mirror file system X to link and mirror between a local file system A and an Imported Network File system B. The local file system A has a physical device Data X A on the Master Mirror Server X system, the Imported Network File system B is a Network File System (NFS) exported from a Slave Mirror Server Y on the network. Its physical storage is the Data B on the Slave Mirror Server Y. The mounting protocol, file system and file operations are the same as the two local file systems mirroring configuration described previously.
